

## Circuit diagram for NordicFlow<sup>®</sup> Butterfly valves with supervisory switch

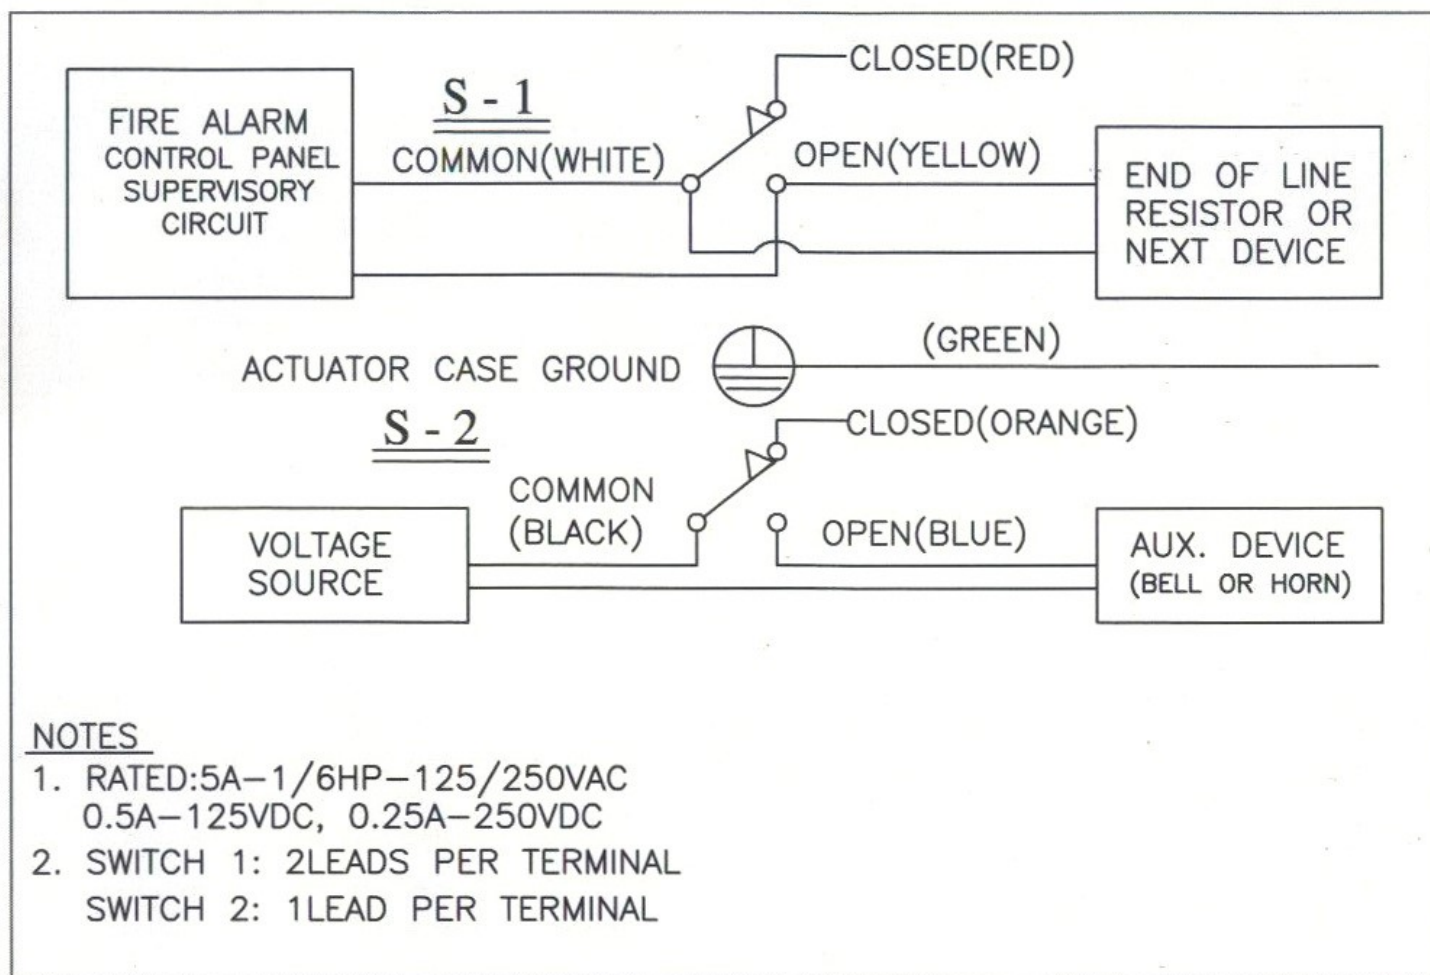

**The circuit diagram is valid for valves that are open in operating position.**

The alarm sounds when the hand wheel is turned  $\frac{3}{4}$  turn from fully open position toward the closed position. The disc is still in almost fully open position.

To obtain this feature, there are two different switches available.

- Black-Orange with green earth
- White-Red with green earth

For detailed information see the wiring diagram below.
