

NordicFlow® Manual Roll Grooving Machine TWG-11A

Description

TWG-11A is a manual roll grooving service tool that is equipped with carrying handle for ease of transporting. It is robust and simple to operate. TWG-11A is designed to be used either completely manually or attached to a power unit (Ridgid 300 or similar). It is suitable for small modifications as well as larger projects (pipe sizes DN20 – DN200). All the tools for operating the machine and changing grooving rolls are included.
